

executive office desk | IRIS _wood

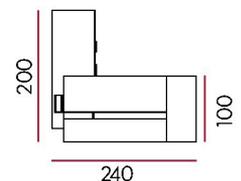

description:

Layer after layer in a contemporary and architectonic composition Iris Wood Executive Office Desk has well-designed and executed details. The main working surface is a formation of materials that add a dynamic style to the furniture. A leather surface, that contains provisions for cable managing, is the main protagonist of the design while two perpendicular 18mm melamine wood pieces surround it. This formation is highlighted and supported by two other layers in a silver finish. Specifically an 18mm MDF panel designed in a curve and a structural steel frame complete the impressive design. The supporting legs are in a steel arch form completed with aluminum paint in silver electrostatic paint. This executive office desk is available with a highly functional service unite that provides open able storage, drawers as well as cable managing provisions.

The model is recommended from an extended suite, which includes bookcases, conference tables and coffee tables under the collections of Iris and Atlas.
