

executive office desk | **ATLAS**description:

Defined by rigorous lines and solid surfaces, the Atlas Executive Office Desk is a timeless piece with a strong presence. The design highlights a top working surface by lowering the sides that form the supporting legs. An extension of the desk creates an L-shape that provides extra surface area as well as storage, including a fixed drawer and lock. A central locking system is also available. All surfaces are made of 39mm melamine wood and the edges meet at a 45-degree angle. A collection of melamine finishes as well as a variety of wood veneers are available for customisation of the model, fitted to the style chosen by the client.

The model is recommended from an extended suite, such as bookcases, conference tables and coffee tables.
